SOLD OVER ASK — SFH / CONDO

84 / 55%

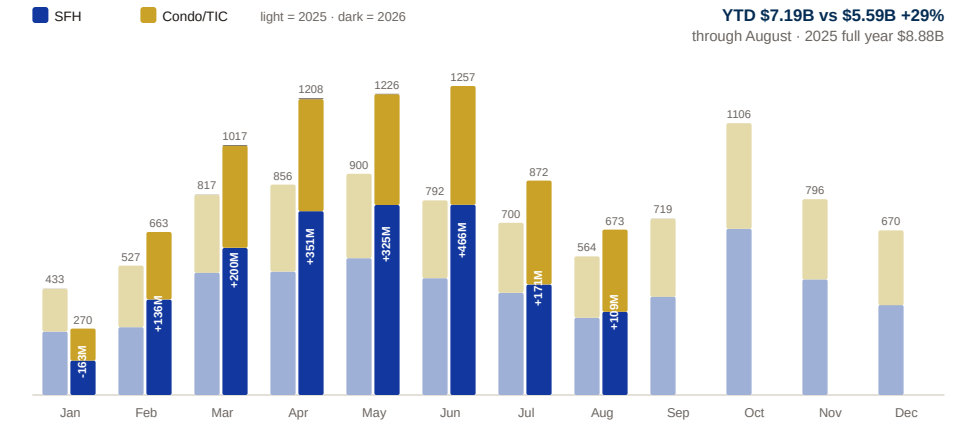

Versus 25: +9 / +19 pts

How Many Sold

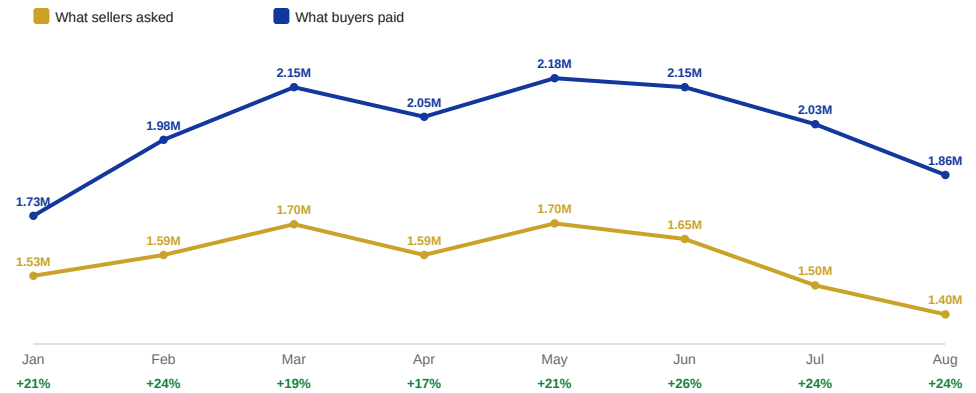

Light bars are last year, dark bars this year. 3,478 homes have sold, against 3,218 by this point last year.

How Much Money

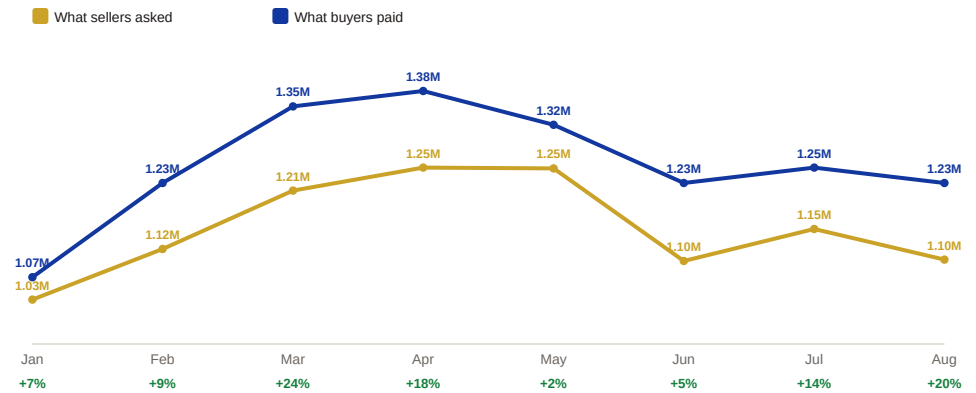

Millions of dollars a month. \$7.19B so far against \$5.59B — far more money on only +8% more sales.

Asking Price vs What Buyers Paid — Houses

Blue sits above gold every month this year: buyers paid over asking all year. The figure under each month is the change from last year.

Asking Price vs What Buyers Paid — Condos

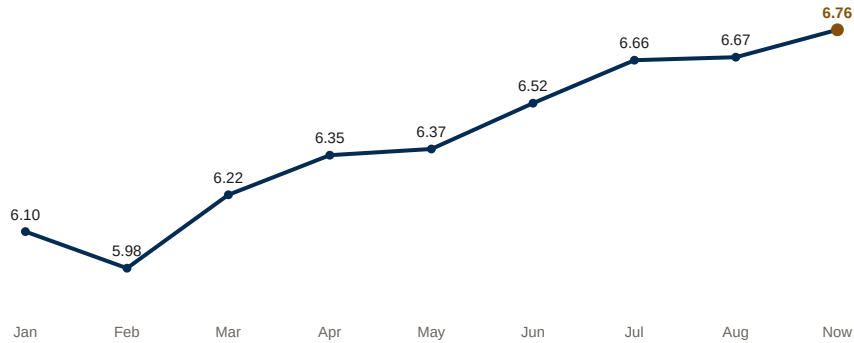

Same story for condos, with a narrower gap — sellers ask about \$1.13M and get about \$1.24M.

The National Picture

Four numbers set the rules for every sale in the city. None of them are decided in San Francisco.

Chuck Heaver · Vanguard Properties
Freddie Mac · U.S. Treasury · BLS · EDD

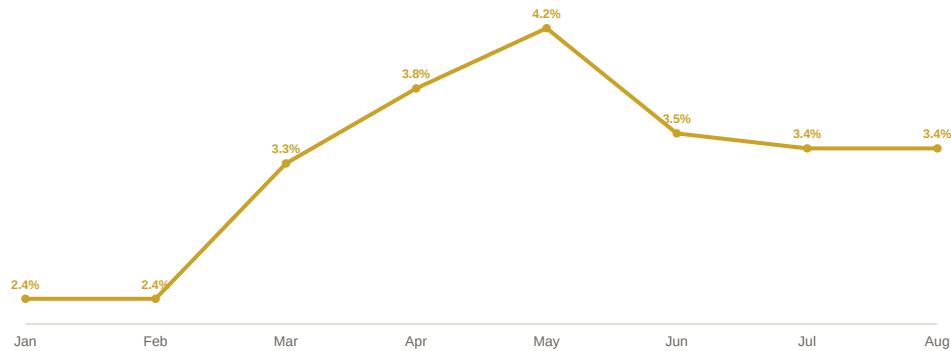

Mortgage Rates — What a Loan Costs

The rate on an ordinary 30-year loan: **6.10%** in January, down to 5.98% in February, **6.76%** now. A higher rate means a bigger payment for the very same house.

Inflation — How Fast Everything Costs More

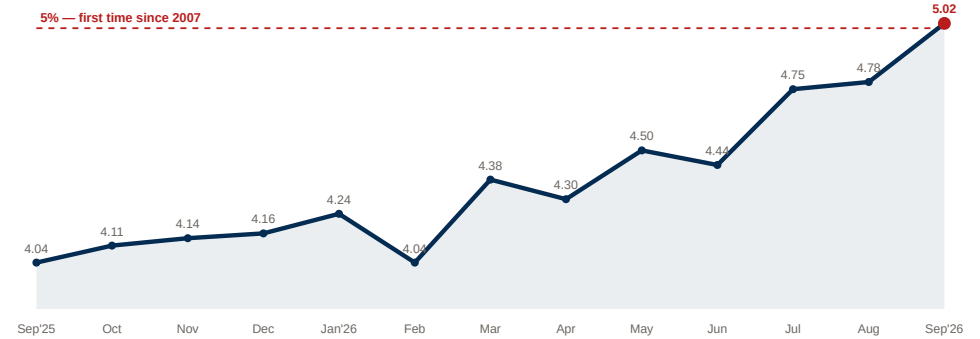

Prices vs a year ago

How much more things cost than a year ago: 2.4% in January, up to 4.2% in May, **3.4%** now. While this stays high, loans stay expensive.

How the four fit together. Inflation keeps the Treasury high. The Treasury sets the mortgage rate. The mortgage rate decides what a financed buyer can pay. Jobs decide how many buyers there are at all. Right now the first three are working against buyers and the fourth is working for them — which is why prices rose **+24%** in a year of expensive money.

The 10-Year Treasury — What Sets That Rate

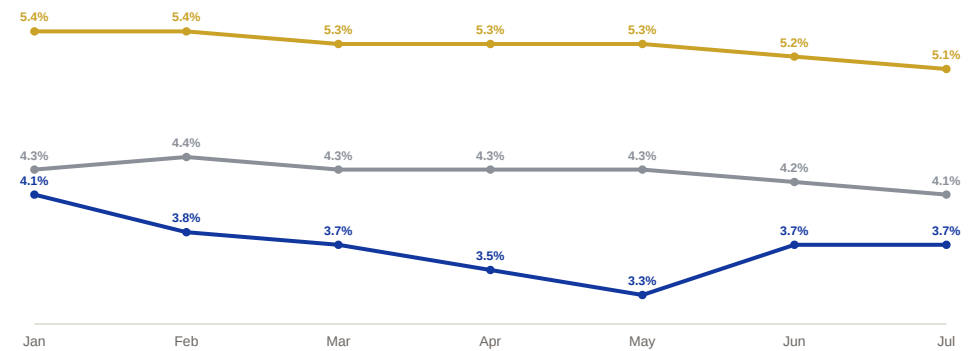

What the government pays to borrow for ten years. Banks price home loans off this, then add about 1.7 points. It was 4.04% a year ago and is **5.02%** today — the highest since 2007.

Jobs — Who Is Working

San Francisco

California

United States

Share of people looking for work. San Francisco is at **3.7%** against 5.1% statewide and 4.1% nationally — more people working here means more people able to buy.

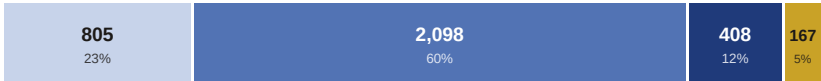

Where the Money Came From

\$7.19 billion changed hands in 3,478 sales this year. It did not come from where most people assume.

Chuck Heaver · Vanguard Properties
Closed sales, Jan 1 – August 31

The Same Market, Counted Two Ways

HOMES SOLD — ALL TYPES

MONEY SPENT

Under \$1M \$1–3M \$3–5M \$5M+

The top bar counts **homes**, the bottom counts **dollars** — same four price ranges, completely different shapes. **805** homes sold under \$1M and brought **\$586M**; just **167** sold over \$5M and brought **\$1,380M**.

Houses or Condos?

HOMES SOLD

MONEY SPENT

Houses Condo / TIC / Other

More condos change hands than houses, yet houses bring in more money.

167 homes — one sale in twenty — brought in \$1.38 billion.

More than twice what the 805 homes under \$1M brought in, from a fifth as many sales.

Every Price Tier, in Full

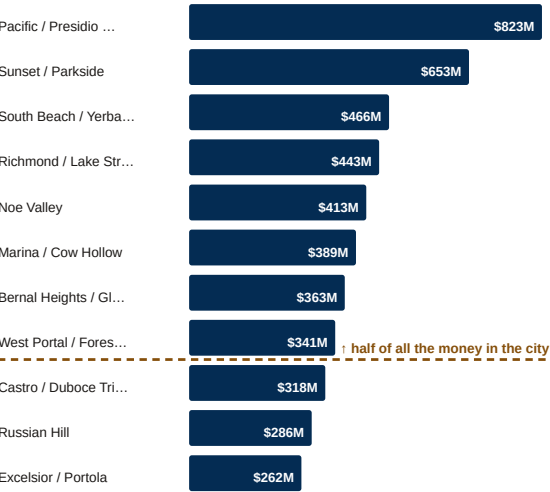

PRICE	SALES	% SALES	MONEY	% MONEY	WEIGHT
Under \$1M	805	23%	\$586M	8%	0.4×
\$1–3M	2,098	60%	\$3,659M	51%	0.8×
\$3–5M	408	12%	\$1,561M	22%	1.9×
\$5M+	167	5%	\$1,380M	19%	4.0×

Weight is the giveaway. **1.0×** means a price range brings in exactly its fair share of the money. Under \$1M scores **0.4×**; over \$5M scores **4.0×**.

The Short Version

- 8 — neighborhoods out of 36 produced half the money in the whole city
- 27 — % of every dollar came from just three neighborhoods
- Price — not volume, is what moved. Homes sold are up 8%; money is up 29%
- \$2.07M — the average San Francisco sale this year, across every home type

Which Neighborhoods Hold the Money

Top eleven by dollars closed. **Pacific / Presidio Heights** alone took **\$823M** — **11%** of the city — on 5% of its sales.

The one to remember. Half the money in San Francisco real estate this year came from **8 neighborhoods**. If your home is in one of them, your buyer pool is deeper than the citywide numbers suggest. If it is not, price and presentation carry the whole job.

Who Is Buying

Two buyers, two completely different triggers. One watches the mortgage rate. The other never thinks about it.

Chuck Heaver · Vanguard Properties
Closed sales · Treasury & Freddie Mac

The Financed Buyer

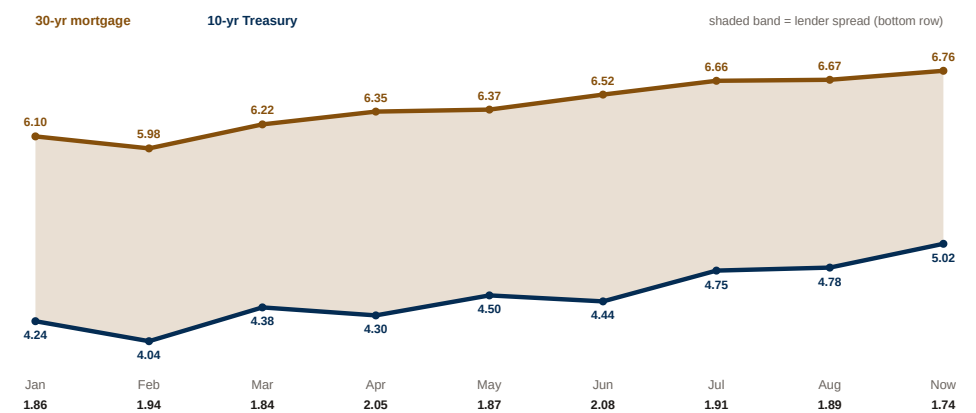

Most of the market. What they can pay is set by the mortgage rate, and the mortgage rate is set by the bond market.

What a Rate Move Costs, Every Month

30-YR RATE	SFH MEDIAN	VS 6.10%	CONDO MEDIAN	VS 6.10%
6.10%	\$10,060	0	\$6,181	0
6.76%	\$10,778	+718	\$6,622	+441
7.00%	\$11,044	+985	\$6,786	+605
7.25%	\$11,324	+1,265	\$6,958	+777

Monthly payment on a typical \$2.08M house and \$1.27M condo with 20% down. January's 6.10% to today's 6.76% costs a house buyer **\$718 more a month — \$8,619 a year** — for the same house.

Home Loans Follow the Bond

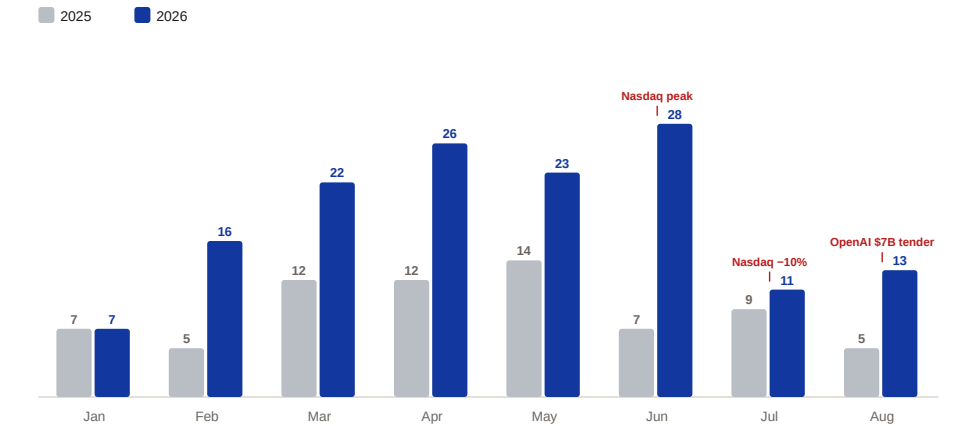

Gold is your home loan, blue is what the government pays. The gap between them barely moves, so the bond leads and your rate follows.

What moves them. The financed buyer moves when the ten-year Treasury moves. Under **4.5%** home loans fall into the low 6s and buyers come back out; hold at 5% and loans head toward 6.82% and fewer people qualify. Watch the bond, not the Fed.

The Cash Buyer

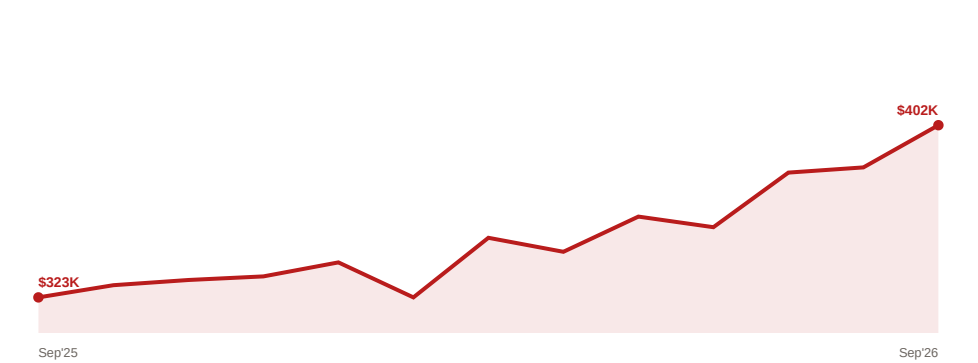

4.8% of the sales, 19% of the money. They pay cash, so the mortgage rate is beside the point.

\$5–10M Sales by Month — 2025 vs 2026

146 sales against 71 last year, +106%. Watch the shape: 28 in June, 11 in July when the stock market fell 10%, back up in August after OpenAI let staff cash out \$7 billion of shares. Last year had no summer dip — so this is the stock market, not the season.

What an \$8M House Costs to Just Hold

A cash buyer pays no interest — they give up interest. That same \$8M in government bonds earns **\$402K a year**; add property tax and holding the house runs **\$496K a year**.

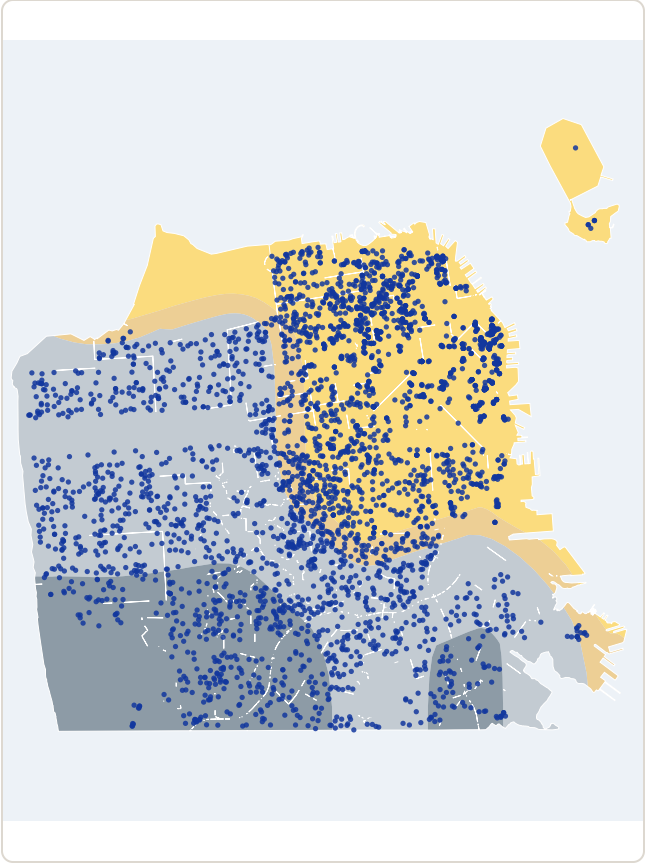

What moves them. The cash buyer moves on two things: what their money earns sitting still — **5.02%** right now, tax-free of California — and whether they can get at it, which means share sales and IPOs. One thing outranks both: **need**. A family that has outgrown the house buys this year at whatever the market asks.

The Neighborhoods

Where the sales landed, what they went for, and what the fog has to do with the price

Chuck Heaver · Vanguard Properties

Every Sale This Year, on the Fog Map

● 3,478 closings, 2026 YTD Sun Transition Fog Persistent Fog

Every 2026 closing over the city's summer-fog zones — my database, my map, and nobody else publishes it. Zones by daily summer fog hours: Sun ≤8.0 · Transition 8.5–8.9 · Fog 9.0–10.9 · Persistent Fog ≥11.

What the Fog Is Worth

- **\$4.21M** — Median sale price, Sun zone
- **\$1.96M** — Median sale price, Fog zone
- **\$1.63M** — Median sale price, Persistent Fog
- **1639** — \$/SF in the sun against \$984 in persistent fog

What Changed on the Ground

- **58** — % of first-half office leasing went to AI. Near a 30-year high
- **25** — % drop in property crime. Homelessness at a 15-year low
- **69** — Extra South Beach condo sales — 1M sq ft of AI is a walk away
- **3,491** — Homes approved at Stonestown, the west side's first big supply
- **0** — New supply in the fog belt. All of it is sun-side

Why me. Every number here comes from my own database of every closed sale in San Francisco, mapped to its neighborhood and its microclimate. I price to the crowd a home will actually draw. Ask me to run your street.

In Depth

The detail behind the charts — read it if you want it, skip it if you don't

Chuck Heaver · Vanguard Properties

Attention Sellers

- **53** — % of house closings at least 20% over ask
- **12** — Days to sell a house (median)
- **26** — % of houses under contract in a week
- **124** — % of list the winning house bid paid. Was 112% in '25
- **16** — Days to sell a condo. Was 32 in '25
- **55** — % of condos now selling over list
- **35** — % drop in active listings vs '25

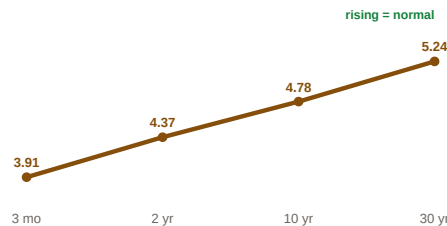

Attention Buyers

- **124** — % of ask to budget on a house
- **106** — % of ask to budget on a condo
- **\$655K** — Mortgage that \$4,250 rent carries at 6.76%
- **56** — Days to sell a Diamond Heights condo. Take your time
- **\$1.63M** — Cheapest way in — fog-belt house at \$984/sf

How a Mortgage Rate Actually Gets Set

- **5.02** — % — what the government pays to borrow for ten years
- **1.74** — Points the bank adds on top for its costs and its risk
- **6.76** — % — your home loan rate. Those two, added together
- **0.98** — Points the government's rate rose in twelve months

The Yield Curve Today

What you earn lending the government money for three months, two years, ten years and thirty. Normally the line rises — lend longer, earn more — and it does today. When it tips the other way, short money paying more than long, it is called **inverted**, and that has come before every U.S. recession since the 1970s. We are not there.

Rents. A one-bedroom now runs \$4,250 a month, +25% more than last year — the fastest rise in the country. That same \$4,250 covers the payment on a \$655K mortgage, which is why renters keep turning into buyers.

What Pulls a Cash Buyer Back

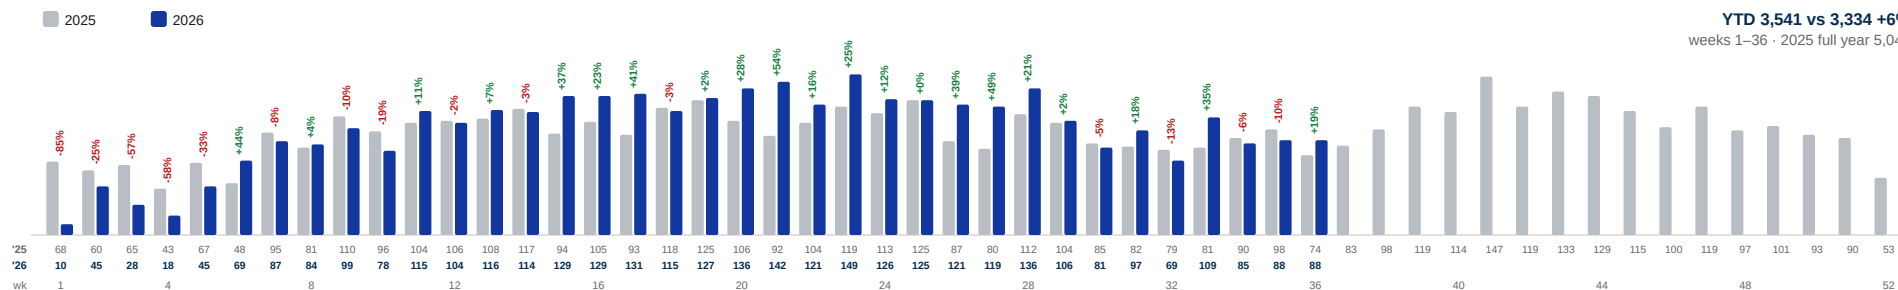

- **Stocks** — falling. Their shares are the down payment, and the market dropped twice this year
- **5.02** — % — what cash earns doing nothing. The higher that goes, the better waiting looks
- **No way** — to sell shares. Rich on paper is not the same as able to buy

What Brings Them In

- **Need** — first. A growing family, a move, a school year — none of it waits for the Nasdaq
- **\$7B** — OpenAI tender in August at an \$852B valuation. 300+ new decamillionaires
- **Scarcity** — 41 trophy sales a year in Pacific Heights. You buy when one appears
- **Prop 13** — Buy now and the assessment is locked at today's price for as long as you hold

How to read this report. **Median** is the middle sale — half sold for more, half for less, and it ignores extremes. **Average** is the total divided by the count, so one \$30M sale drags it up. **Homes** means every residential type unless a chart says SFH or Condo. **YTD** is January 1 to August 31, always compared with the identical stretch of 25.

Units Sold by Week — Every Week of Both Years

YTD 3,541 vs 3,334 +6%
weeks 1–36 · 2025 full year 5,044

Grey bars after week 36 show where last year kept going — its busiest stretch was early October, which is what a full autumn looks like.

Latent Inventory — Single-Family Houses

Every house in the city beside the ones that sold. **1.6%** changed hands January through August — about one house in 61.

Hayes Valley	63	5	7.9%*	1 in 13	2.80M	1,333	7	80%
SOMA	55	1	1.8%*	1 in 55	2.80M	424	80	0%
All single-family	94,016	1,531	1.6%	1 in 61	2.08M	1,169	12	84%

Size is not supply. Sunset / Parkside holds the most houses — 22,152 — and released 293 (1.3%). Turnover runs from 1.0% in Visitacion Vly / Silver Terr to 4.1% in Noe Valley: the same buyer sees very different odds of a house coming up depending on where they are looking.

Houses are single-unit residential parcels in the SF Land Use dataset; sales are single-family closings (SFAR MLS). * Fewer than 250 houses in the area — a handful of sales moves the rate, so read it with care. Not listed (fewer than 50 houses — condo districts): Dogpatch, Downtown / Civic Center, Mission Bay, North Beach / Waterfront, South Beach / Yerba Buena. 1 parcel(s) fell outside the mapped areas.

Median and average sale prices in millions (M) or thousands (K); \$/SF and DOM as whole numbers; list-price columns are percentages. Current-period figures are bold and colored against the same period a year earlier — green better, red worse (for DOM, fewer days is better). Prior-year columns in grey. * fewer than 10 YTD sales — read with care. Sorted by YTD median price. Totals are pooled medians (the median of every sale, not an average of area medians).

San Francisco Market Grid

Month: Aug 1 – Aug 31, 2026 vs Aug 2025 · Year to date: Jan 1 – Aug 31, 2026 vs same period 2025

Median and average sale prices in millions (M) or thousands (K); \$/SF and DOM as whole numbers; list-price columns are percentages. Current-period figures are bold and colored against the same period a year earlier — green better, red worse (for DOM, fewer days is better). Prior-year columns in grey. * fewer than 10 YTD sales — read with care. Sorted by YTD median price. Totals are pooled medians (the median of every sale, not an average of area medians).
