Light bars are last year, dark bars this year. 3,956 homes have sold, against 3,643 by this point last year.

Navy sits above yellow every month this year: buyers paid over asking all year. The figure under each month is the change from last year.

Millions of dollars a month. \$8.16B so far against \$6.31B — far more money on only +9% more sales.

Same story for Condo/TIC/Other, with a narrower gap — sellers ask about \$1.15M and get about \$1.25M.

The National Picture

Four numbers set the rules for every sale in the city. None of them are decided in San Francisco.

Chuck Heaver · Vanguard Properties
Freddie Mac · U.S. Treasury · BLS · EDD

Mortgage Rates — What a Loan Costs

The rate on an ordinary 30-year loan: 6.10% in January, down to 5.98% in February, 7.03% now. A higher rate means a bigger payment for the very same house.

Inflation — How Fast Everything Costs More

Prices vs a year ago

How much more things cost than a year ago: 2.4% in January, up to 4.2% in May, 3.4% now. While this stays high, loans stay expensive.

How the four fit together. Inflation keeps the Treasury high. The Treasury sets the mortgage rate. The mortgage rate decides what a financed buyer can pay. Jobs decide how many buyers there are at all. Right now the first three are working against buyers and the fourth is working for them — which is why prices rose **+21%** in a year of expensive money.

The 10-Year Treasury — What Sets That Rate

What the government pays to borrow for ten years. Banks price home loans off this, then add about 1.7 points. It was 4.04% a year ago and is 5.29% today — the highest since 2007.

Jobs — Who Is Working

San Francisco

California

United States

Share of people looking for work. San Francisco is at 4.2% in August, up from 3.7% in July, against 5.1% statewide and 4.1% nationally. Still well below the state.

Detail — Allocation of Money

\$8.16B changed hands in 3,956 sales this year.

Chuck Heaver · Vanguard Properties
Closed sales, Jan 1 – September 30

Allocation by Tier

The top bar counts **units**, the bottom counts **dollars** — same four price ranges, completely different shapes. 916 units sold under \$1M and brought \$666M; just 194 sold over \$5M and brought \$1.59B.

Allocation by Type

More Condo/TIC/Other units change hands than SFH, yet SFH bring in more money.

Allocation by Neighborhood

Top twenty by dollars closed. Pacific / Presidio Heights alone took \$913M — 11% of the city — on 5% of its sales.

The Cost of Financing an Average Home

30-YR RATE	SFH MEDIAN	VS 6.10%	CONDO MEDIAN	VS 6.10%
6.10%	\$9,938	0	\$6,181	0
6.50%	\$10,366	+428	\$6,447	+266
7.03%	\$10,944	+1,006	\$6,807	+626
7.50%	\$11,467	+1,529	\$7,132	+951

Monthly payment on a typical \$2.05M SFH and \$1.27M Condo/TIC/Other with 20% down. January's 6.10% to today's 7.03% costs an SFH buyer \$1,006 more a month – \$12,069 a year – for the same house.

Home Loans Follow the Bond

Yellow is your home loan, navy is what the government pays. The gap between them barely moves, so the bond leads and your rate follows.

The Yield Curve Today

Lend longer, earn more – the line rises, as it should. When it tips the other way it is **inverted**, which has come before every U.S. recession since the 1970s. We are not there.

What moves the financed buyer

- The 10-year Treasury leads; home loans run about 1.7 points above it.
- Treasury under **4.5%** → loans in the low 6s → buyers come back.
- Treasury above **5%** → loans above 7% → fewer buyers qualify.
- Watch the bond, not the Fed.

The Cash Buyer

Watching Bond Yields

Over \$5M — Sales by Month, 2025 vs 2026

194 sales against 92 last year, +111%. Sales peaked at 32 in June and fell to 15 in July, the month the Nasdaq dropped 10%.

Annual Opportunity Cost of Owning an \$8M Home

What moves the cash buyer

- **1. Need** – a family that has outgrown the house buys this year, at whatever the market asks. Outranks the other two.
- **2. Liquidity** – can they get at the money: share sales, tender offers, IPOs.
- **3. Opportunity cost** – cash left in 10-year Treasuries earns **5.29%**, free of California tax.

Size is not supply. Sunset / Parkside holds the most SFH — 22,152 — and released 328 (1.5%). Turnover runs from 1.1% in Visitacion Vly / Silver Terr to 4.6% in Noe Valley: the same buyer sees very different odds of an SFH coming up depending on where they are looking. SFH are single-unit residential parcels in the SF Land Use dataset; sales are single-family closings (SFAR MLS). * Fewer than 250 SFH in the area — a handful of sales moves the rate, so read it with care. 1 parcel(s) fell outside the mapped areas.

Median and average sale prices in millions (M) or thousands (K); \$/SF and DOM as whole numbers; list-price columns are percentages. Current-period figures are bold and colored against the same period a year earlier — green better, red worse (for DOM, fewer days is better). Prior-year columns in grey. * fewer than 10 YTD sales — read with care. — means no sales in that period (a median needs at least one). Sorted by YTD median price. Totals are pooled medians (the median of every sale, not an average of area medians).
